

Mission Pacific Principals

Mission Pacific Land Company is a real estate investment company that was founded to take advantage of real estate development and investment opportunities in Southern California. Mission Pacific principals have extensive experience and success in all aspects of real estate development, including property due diligence and acquisition, asset management, project entitlement, home-building, finance and asset disposition.

Since 2002, Mission Pacific principals have – for their own account and with partners – purchased over 1,250 acres of raw land in Inland Southern California, entitled and sold over 1,700 lots, and been actively involved in the entitlement of large retail and industrial sites. Utilizing their conservative, disciplined and hands-on approach, along with their ability to solve the most difficult development challenges, Mission Pacific principals entered and exited the most recent real estate cycle with impressive financial returns.

Mission Pacific principals are personally active and intimately involved in virtually every aspect of the day-to-day management of their real estate assets. Mission Pacific principals maintain close working relationships with leading professionals in the areas of land brokerage, banking and finance, law, engineering, economics, homebuilding, and environmental mitigation, as well as governmental and public officials.
